

Method for Secure Communication for Sensor Network

Irma Aslanishvili

Ivane Javakhishvili Tbilisi State University

Abstract: The sensor has to do the following tasks: Give a digital signal, be able to communicate the signal, be able to execute logical functions and instructions. Method for Secure Communication for Sensors Networks are used in everyday and they are in everywhere. The objective of “ Method for Secure communication for Sensor Network“ is to provide a collection of high-quality research papers in signal processing for Computer Sensor Networks. One Method motivated by the idea of developing the high effective sensory systems for monitoring of environmental pollution.

Keywords: Sensor Networks, Communication, Analysis, protocols and monitoring.
